

## Lutheran HealthCare Medical Arts Pavilion.

*A multi-specialty private practice  
for all your medical needs*

At the **Lutheran HealthCare Medical Arts Pavilion**, you can be sure that the most experienced physicians will take care of you. Our doctors are board certified faculty practice experts who, in many cases, are lead researchers, educators and department chairs. The majority of our physicians are world renowned and have been named as "Top Doctors in New York Metro Area" by *The Castle Connolly Guide*.

The Medical Arts Pavilion offers a multicultural staff that stands ready to help you. Translation/interpretation services are available in 180 languages.

We are conveniently located in the heart of Bay Ridge, Brooklyn. Subway and bus stations are easily accessible to and from our location.

### Financial Services

Lutheran accepts most insurance plans. We can provide information and assistance to patients who need help understanding their insurance plans, including government entitlement programs such as Medicare, Medicaid, Health Plus and Child Health Plus.

**Subway:** R train to 86th Street

**The Medical Arts Pavilion  
Specialty Medical Services Include:**

**Endocrinology**

Our endocrinologist diagnoses and treats patients with diseases and disorders of the endocrine system and metabolism, such as diabetes and thyroid disorders.

**Infertility, Reproductive Endocrinology  
and Gynecology**

The Medical Arts Pavilion is a licensed tissue bank that provides high-quality care for couples and individuals who need assistance with fertility. Our staff is experienced with advanced fertility treatments and technologies, including: in-vitro fertilization, intrauterine insemination, and donor eggs. We also provide surgical intervention for numerous gynecologic problems including: fibroid infection, endometriosis, pelvic pain and abnormal pap smear. In addition, we provide medical care for absence of menses, premenstrual syndrome, polycystic ovarian syndrome, contraceptive counseling, osteoporosis and menopausal symptoms.

**Neurology Services**

Our neurological team includes neurologists, a neuro-psychologist, physician assistants and rehabilitation specialists who provide comprehensive treatment for a broad range of disorders including stroke, multiple sclerosis, epilepsy, frequent headaches, Parkinson's disease, back pain and balance disorders. Our physicians develop care plans that are patient centered and focus on diagnoses and treatments which enable you to get back to life quickly. Specialized programs are available to patients recovering from the side effects of stroke and/or orthopedic conditions.

**Physical Medicine and Rehabilitation**

Our physiatrists help you recover from fractures and joint replacements, neurological conditions, orthopedic and muscular conditions, stroke and trauma from accidents. They work in partnership with the Rehabilitation Network to provide three distinct levels of care, short- and long-term sub acute care as well as home care services at Lutheran Augustana Center and outpatient therapy through the Lutheran Family Health Centers.

**Surgical Services**

Our surgeons, all of whom are board certified, specialize in laparoscopic procedures for hernias, gall bladder disease and breast problems. Our cardiovascular and thoracic surgeons provide care for arterial blockage that can produce strokes, leg pain, lung screening for cancer, pacemakers and also treatment of varicose veins. We also provide consultation for surgery, pre-operative, post-operative and follow-up care for patients treated in the Lutheran Medical Center Trauma Center.

**Vascular Surgery**

Our vascular surgeon is specially trained in minimally invasive endovascular therapy to provide comprehensive state of the art diagnostic and therapeutic interventions for the entire spectrum of circulatory disorders, including aortic and peripheral arterial aneurysms; cerebrovascular disease and stroke prevention; arterial occlusive disease ranging from leg pain with walking to critical limb-threatening arterial insufficiency, and aggressive wound care; vein disorders including varicose veins, chronic venous insufficiency, and thrombophlebitis; thoracic outlet syndrome; dialysis accesses like catheters for Hemodialysis, and AV fistulas.

**Other Services:**

**Cold Laser Therapy**

Cold laser therapy heals at the cellular level using infra-red light to help injured cells return to normal function. Used to treat muscle and joint problems, it can quicken the healing process for conditions such as soft tissue and sports injuries, repetitive stress injuries, arthritic conditions, herniated disc and much more.

**Acupuncture**

Acupuncture uses thin sterile needles inserted at specific pressure points in the body and is known to have healing effects for headache, sports injuries, neck and back pain.

**Anticoagulant (Coumadin) Service**

**Testing, Results and Treatment  
within 30 minutes**

This service is available to meet the specific needs of patients who take blood-thinning medication. A patient on long-term anticoagulation drug therapy must be closely monitored to assure safe and effective treatment.
